I read the The Calypso Directive a few years back and saw that the author is making a series of the Think Tank. I loved the first book, especially the companion novella Ring of Flowers. The Infiltration Game doesn't disappoint. Most of the Think Tank crew is here for another intriguing thriller. This time rather than dealing with a deadly virus, the team is working to stop a nefarious Chinese

corporation trying to embed its spy technology into US military hardware. Seeing what has unfolded over the last few years with multinational Chinese companies buying US companies, government sponsored hacking and actual Chinese CPUs with embedded spyware; this novel is spot on and puts context around what must be happening out in the real world everyday. The author does a great job coming up with clever and realistic ways for the Think Tank to hack into and get hacked by others. Most thrillers gloss over the hacking but this one is very plausible; a la Mr Robot (another favorite). Can't wait to read the next book in the series. Let's hope there is one...

Excellent read. Thoroughly enjoyed it. What a mind rape. International intrigue on America's soil with so many twists and turns. Enjoyed the introduction of characters in the beginning kept people in focus until all of the pieces fit together. If I didn't have that I would have been like Porter. I could see another book in the future I hope so.

Excellent writing-storytelling! Captures your attention, makes you think about all the possibilities of truth that lies within the fiction. I am a Brian Andrews fan!
