# Experimental Psychology (PSY 301 Introduction To Experimental Psychology)

## **Synopsis**

Focusing on experimental methods, authors Anne Myers and Christine Hansen lead students step by step through the entire research process, from generating testable hypotheses to writing the research report. The major sections of the book parallel the major sections of a research report (Introduction, Method, Results, and Discussion), giving students the skills they'll need to design and conduct an experiment, analyze and interpret the research findings, and report those findings. Although the main focus is on experimentation, alternative approaches are discussed as important complements.

## **Customer Reviews**

Exactly what I was looking for!

Excellent book

Good resource

Good book.

thank you

Book is easy to understand, but does get hard on the eyes if reading a large amount. Would be nice if there was more of a contrast in color on pages.

Perfect text shipped in great time. The book is LIKE NEW and absolutely totally clean. A+++

A reasonable price without sacrificing any quality of the condition.
