# Physical Chemistry For The Chemical Sciences: RSC

## Synopsis

Following in the wake of Chang's two other best-selling physical chemistry textbooks, this new title introduces laser spectroscopist Jay Thoman (Williams College) as co-author. This new text has been comprehensively reviewed regarding both level and scope. Targeted to a mainstream physical chemistry course, this text features extensively revised chapters on quantum mechanics and spectroscopy, many new chapter-ending problems, and updated references, while biological topics have been largely relegated to the previous two textbooks. Other topics added include the law of corresponding states, the Joule-Thomson effect, the meaning of entropy, multiple equilibria and coupled reactions, and chemiluminescence and bioluminescence. One way to gauge the level of this new text is that students who have used it will be well prepared for their GRE exams in the subject. Careful pedagogy and clear writing throughout combine to make this an excellent choice for your physical chemistry course. Support materials are available for this title. For more details please contact [booksales@rsc.org](mailto:booksales@rsc.org)"With expanded coverage and more depth, Chang's newest book is now an excellent fit for students on the BS Chemistry track. It will provide them with the rigorous foundations knowledge they need for advanced studies in any sub-disciplines of chemistry, including biochemistry/biophysical chemistry."-Taina Chao, State University of New York, Purchase"The most student-friendly P Chem text available."-Howard Mayne, University of New Hampshire"I expect this textbook will be high on the list for instructors seeking a thorough, integrated approach to the subject of Physical Chemistry, combined with a clear and conversational writing style." -Alan Van Orden, Colorado State University "The new Chang/Thoman text is very good. I like its approach and it is very easy to read and well organized. In my opinion, this text makes a much better approach to Physical Chemistry than the other texts currently sold."-Mark Obrovac, Dalhousie UniversityNOT AVAILABLE IN NORTH AMERICA AND CANADA

## Book Information

Paperback: 968 pages

Publisher: Royal Society of Chemistry (March 19, 2014)

Language: English

ISBN-10: 1782620877

ISBN-13: 978-1782620877

Product Dimensions: 8.5 x 1.5 x 10.9 inches

Shipping Weight: 3.9 pounds

Average Customer Review: 4.7 out of 5 starsÂ  See all reviewsÂ  (3 customer reviews)

Best Sellers Rank: #659,611 in Books (See Top 100 in Books) #172 in Books > Science & Math > Chemistry > Physical & Theoretical > Physical Chemistry #1760 in Books > Textbooks > Science & Mathematics > Chemistry #159416 in Books > Reference

## Customer Reviews

This is the international version of the book as they do not yet print it in paperback format. However, the numbers for the example/homework problems are the same, so it's a good deal! It came in a timely manner, which is always nice, and my only concern with this book was that it was a different version than the one I needed, but it turned out to be okay!

Exactly as described

Excellent price. Excellent book condition. Hope to do business with you again. Thank you.
