Customer Reviews

As a Library Assistant studying for my Library Technician degree this set of books became my best friend. While most colleges or universities will have copies for loan, I found that I often added things to the book, thus the importance of having your own copy. The first volume covers the rules for using and assigning DDC numbers. The second and third volumes contain the schedules / summaries for actually assigning the DDC number. The fourth contains the Relative Index (a Library Tech's best friend), which assists in locating appropriate numbers. I know it's a lot of money, but it is well worth it if you are serious about working in this field.

I have no problems with this three-volume set, I assume you know what you're ordering. The price, at ~\$78 might be a good price, considering the new price of this set. But there are a couple of things you might consider: 1) This is the 19th edition, published in 1979. So there are going to be topics not classified yet, especially in science, modern history, and politics. 2) Most recent books have the DDS classification in the Library of Congress Cataloging in Publication Data on the Publishing Page of the book, maybe obviating the need for a classifying book. 3) I've ordered this same set (on 7-9 and 7-10-13), but ordered from separate sellers. I paid \$1.49 + \$4.79 + \$3.35 (plus \$11.97 S&H), for a total of \$21.60 (for all three volumes). You might consider ordering from separate sellers, if price is important to you. But, otherwise I find the Volume 2 (actual DDS numbers) and Volume 3 (subject index) to be invaluable. And as an earlier review mentioned, if this is your personal copy, or for a

personal collection (a very large personal collection), writing in the book (lots of available space) is a very good idea.

I have always wanted a copy of DDC 22. Well when DDC 23 came out....DDC22 was now the "old" edition and I could get it for a good price. This is a 4 volume set of books used to do cataloging in public libraries and other libraries that use the Dewey Decimal classification system. I received it on time and it was in very good condition. Price of \$49.00 was great for 4 books. I am very satisfied with my purchase.
