Synopsis

Used after the AEPSÂ® Test is completed and scored, this developmentally sequenced curriculum allows professionals to match the child's IFSP/IEP goals and objectives with activity-based interventionsâ "beginning with simple skills and moving on to more advanced skills. Because the AEPS Curriculum for Three to Six Years uses the same numbering system as the AEPS Test, users can easily locate activities in the curriculum that correspond to specific goals and objectives identified with the test. Professionals will find:guidelines on designing and implementing interventionsuggested activities for each developmental areateaching considerations and suggestionsrecommendations for environmental arrangementsstrategies for incorporating the activities into the child's daily routines Age-appropriate and easy to use, this curriculum can be tailored to each child's needs and is equally suitable for use in homes, preschools, or child care settings. And to reflect the individual learning styles many children acquire by ages three to six, this curriculum is also more flexible than the AEPS Curriculum for Birth to Three Yearsâ "it provides general intervention considerations and suggested activities rather than specific instructional sequences. This volume is part of the bestselling AEPS system for children from birth to six years who have disabilities or are at risk for developmental delays. Thousands of programs across the country rely on AEPS for comprehensive, seamlessly linked assessment, evaluation, intervention, and programming. AEPS is criterion-referenced and curriculum-based, and with web-based data management through AEPSiâ„¢, it's easier than ever to assess young children and ensure that they make real progress. Learn more about the entire AEPS family of products, including the web-based management system AEPSi.
