Color Atlas Of Canine And Feline Ophthalmology

Synopsis

Ophthalmology relies heavily on the practitioner's ability to visually recognize ocular features and abnormalities. This atlas contains hundreds of full-color pictures of normal and diseased eyes and related structures of dogs and cats as they might be seen during an ocular examination to facilitate visual recognition of problems for accurate diagnosis and treatment. Features over 800 vivid full-color illustrations that aid in the recognition of structures and lesions. Works as a wonderful companion piece to Slatter: Fundamentals of Veterinary Ophthalmology. Contains pictures of both normal and diseased eyes and related structures of dogs and cats to aid in the identification and diagnosis of conditions encountered during ocular examination. Features a consistent, systematic organization from anterior to posterior, including the orbit, in an easy-to-use format.

Book Information

File Size: 14935 KB

Print Length: 256 pages

Simultaneous Device Usage: Up to 4 simultaneous devices, per publisher limits

Publisher: Saunders; 1 edition (August 9, 2004)

Publication Date: August 9, 2004

Sold by: Digital Services LLC

Language: English

ASIN: B005GDZLCS
