Pathology Of Neoplasia And Preneoplasia In Rodents

Synopsis

This colour atlas is a comprehensive summary of the histo- and cytopathology of preneoplastic and neoplastic lesions in laboratory rodents. Each chapter is introduced by a short text explaining the principles and standards of the classification of preneoplasia and neoplasia in the rodent tissues examined. Examples of lesions are presented by a large number of microscopic colour pictures providing a sound basis for correct diagnosis which is crucial for the evaluation of many animal experiments including carcinogenetic bioassays. This atlas is aimed at pathologists, particularly to those working in the experimental field, but it is also of interest to toxicologists and biologists working on rodent models in cancer research or in developmental biology.

Book Information

Hardcover: 180 pages

Publisher: Schattauer GmbH (November 1994)

Language: German

ISBN-10: 3794515536

ISBN-13: 978-3794515530

Product Dimensions: 0.4 x 0.4 x 0.4 inches

Shipping Weight: 1.7 pounds
