Reproducing Jews: A Cultural Account Of Assisted Conception In Israel (Body, Commodity, Text)

Synopsis

There are more fertility clinics per capita in Israel than in any other country in the world and Israel has the world's highest per capita rate of in-vitro fertilization procedures. Fertility treatments are fully subsidized by Israeli national health insurance and are available to all Israelis, regardless of religion or marital status. These phenomena are not the result of unusually high rates of infertility in Israel but reflect the centrality of reproduction in Judaism and Jewish culture. In this ethnographic study of the new reproductive technologies in Israel, Susan Martha Kahn explores the cultural meanings and contemporary rabbinic responses to artificial insemination, in-vitro fertilization, egg donation, and surrogacy. Kahn draws on fieldwork with unmarried Israeli women who are using state-subsidized artificial insemination to get pregnant and on participant-observation in Israeli fertility clinics. Through close readings of traditional Jewish texts and careful analysis of Israeli public discourse, she explains how the Israeli embrace of new reproductive technologies has made Jewish beliefs about kinship startlingly literal. Kahn also reveals how a wide range of contemporary Israelis are using new reproductive technologies to realize their reproductive futures, from ultraorthodox infertile married couples to secular unmarried women. As the first scholarly account of assisted conception in Israel, this multisited ethnography will contribute to current anthropological debates on kinship studies. It will also interest those involved with Jewish studies.

Book Information

Series: Body, Commodity, Text

Paperback: 240 pages

Publisher: Duke University Press Books; 2nd Revised edition edition (October 19, 2000)

Language: English

ISBN-10: 0822325985

ISBN-13: 978-0822325987

Product Dimensions: 0.8 x 6 x 9.2 inches

Customer Reviews

Great topic, well researched and well written. Sometimes funny. I learned a great deal about the

details of the topic. Moreover, the book informs the political issues and climate of statehood for a fledgling nation at the most personal and intimate levels. I've read the other reader's review and can't imagine that the vituperative commentary is in any way suggested by the topic or the book itself. Perhaps a little New Haven vs. Cambridge rivalry. Hey, grow up! If you are a reader with an interest in how Jewish motherhood and Jewish statehood relate, read the book. If you are a kvetch, have some chicken soup and you'll feel better in the morning.

This is an outstanding, fascinating book. It's no wonder it has won several awards. Anyone with an interest in fertility and infertility, Jewish culture and/or tradition, anthropology, and/or reproductive technologies should absolutely read it. Very well done, informative, provocative.

It's no wonder that this book won the National Jewish Book Award this year. Kahn zeroes in on a much neglected area -- the lives of women in Israel-- and a subject -- infertility policy -- of interest not only to medical anthropologists and other scholarly researchers but to interested would-be parents and their friends and families around the world. In exploring Israel's public policy on reproduction and the way Israeli women go about utilizing it, Kahn has written a fascinating, provocative, and rewarding book.

Perfect! Thanks so much :)
