Physics And Chemistry Of Photochromic Glasses (Laser & Optical Science & Technology)

Synopsis

Photochromic glasses are among the most widespread types of glasses, due largely to their popular use in sunglasses. These glasses are used not only in sunglasses, but also in various opto-electronic devices that have been developed and produced throughout the world. Until now, information about photochromic glasses has been widely dispersed in the literature, much of which was published in Russian and therefore of limited accessibility to the Western world. Physics and Chemistry of Photochromic Glasses brings together the combined knowledge and understanding of photochromic glasses from these publications. Coverage includes the structure, optical properties, coloration and bleaching mechanisms, technology, and metrology of these interesting materials.

Book Information

Series: Laser & Optical Science & Technology (Book 15)

Hardcover: 208 pages

Publisher: CRC Press; 1 edition (September 24, 1997)

Language: English

ISBN-10: 0849337801

ISBN-13: 978-0849337802

Product Dimensions: 0.8 x 6.5 x 9.8 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #2,404,519 in Books (See Top 100 in Books) #18 in Books > Science & Math > Chemistry > Photochemistry #89 in Books > Science & Math > Chemistry > Physical & Theoretical > Electrochemistry #131 in Books > Engineering & Transportation > Engineering > Chemical > Coatings, Ceramics & Glass
