Customer Reviews

I'd like to compliment June A. Boon, author of "Manual of Veterinary Echocardiography". I really appreciated the didactic planning-out, the accuracy in the details explanation, the coherence and iconography. The mastery of the subject and the will to teach the beginner come out from the reading. It's, with no doubt, the only manual that allows everybody to approach this science even as a self-taught person. A big 'hi' to June, David, Denali and Logan.

A must buy for the serious clinician. Written by the leading authority in Echcardiology this text is well organized and a timely presentation of the material. Don't let your reference library be without it!
